

First and second fix plumbing checklist

First Fix Stage

So we can run the project as smoothly as possible we will need to have the following on site BEFORE the first day of the booking.

- Bathroom/Kitchen/Utility plans and elevations (see example below)

They need to show clear measurements and locations.

These will be used for the engineers to first fix to. This allows them to bring the pipes to the correct locations for the next stage when they fit the sanitary ware against/to these pipes.

Materials required to be on site for first fix stage:

- Anything concealed
- Shower Valves
- Tap Valves
- Bath Valves
- Toilet frames for wall hung toilets
- Shower trays + traps
- Baths

Second fix stage

Complete sanitary ware needs to be on site BEFORE the first day of the booking. If this will be delayed or not delivered in full please make us aware ASAP.

Kitchens/Utilities

Worktops must be fitted BEFORE we attend for the second fix booking.

Taps need to be on site for this booking.

If you are having a Quooker/Boiling water tap this must be on site for the

Elevations & Plumbing plans
